Profile

Passionate software engineer specialized in crafting high-quality web applications using JavaScript. Sharp eye for detail and focus on user-centric design, with a proven track record of delivering intuitive and visually appealing applications that ensure seamless functionality and a delightful user experience. Enthusiastic about collaborative work and eager to take on impactful projects that foster creativity and innovation. Embraces challenges as opportunities for growth, deeply values knowledge sharing, and always ready to mentor and support colleagues in reaching their full potential.

Employment

Software Developer

Sep 2022 - Present

MINISTRY OF PROGRAMMING

- Developing high-quality web applications with user-centric design.
- Ensuring seamless functionality and a delightful user journey.
- Creating a complex web application for widgets which include dashboard and editor using NextJS with features such as server side rendering, single sign on, advertisements and sharing on social media.
- Using MongoDB and Atlas to create a proxy backend for live score widgets, caching data from a third-party API.
- Taking more responsibilities and ownership of projects.
- Having been involved in the project from its inception, actively contributed ideas which were warmly welcomed.
- Created pixel perfect landing pages from Figma using NextJS.
- Used CMS for better and easier content management.
- Implemented feature for translating the website into multiple languages.
- Collaborated with a team of four developers.
- Delivered completed tasks within the specified timelines and fostered transparency by having daily syncs with the team.
- Independently develop new features across applications while maintaining internal Admin Tools at MultiBank.

Web Developer

Dec 2021 - Aug 2022

GOTIVA GAMES

- Built all front-end projects internally in collaboration with web designers.
- Made a landing page for the company.
- Created admin panel and dynamic web app from scratch.
- Converted Figma design to React making sure that it is pixel-perfect.
- Created reusable components, cloud functions in Firebase, and constructed unit tests.
- Informed clients and investors directly about the status of their applications.
- Learn about the new web development trends, technologies, and standards.

A full-service online performance Media Company for the digital age! Adxpremium SSP and yield management platform enables publishers to manage multiple networks and capture the highest value from every impression.

Git

Languages

English

Hobbies

- Reading Tech Blogs
- Football
- Open Source Contribution
- Gaming

Every potential buyer gains access to the non-guaranteed ad space and competes in real-time for each impression.

MULTIBANK Group

[Fully responsive landing page designed to grab users' attention.](#)

MultiBank Group was established in California, USA, in 2005. Since then, we have evolved into one of the largest financial derivatives providers worldwide, with a current paid-up capital of over \$322 million. We service an extensive client base of over 320,000+ customers from across 90 countries.

Passion Projects

Idomatic Open-source Project for Developers

[Idomatic started as a personal idea to automate something every frontend developer deals with adding and managing element IDs for testing and automation.](#)

Designed and built the entire tool from scratch in Node.js, focusing on simplicity, modularity, and scalability. Compatible with popular frameworks (React, Vue, Angular) and supports multiple parsers for JS/TS and HTML-like files. Includes a CLI for easy setup and configuration, enabling developers to start using it with a single command (npm init idomatic). Fully open-source and published on npm, with ongoing improvements and contributions planned.
